

100 AI MONEY PROMPTS

MAKE MORE. KEEP MORE. DECIDE BETTER.

A practical prompt book for saving, investing, options, charts, budgeting, spending, money psychology, affirmations, gratitude, and income growth.

Copy a prompt. Replace anything in [brackets]. Add your real numbers. Ask follow-up questions. Keep the final decision yours.

AI can organize information, run scenarios, and help you ask better questions. It cannot guarantee returns, predict markets, or replace a qualified financial or tax professional.

CREATED BY GABRIELLE | DOTCOM TRADING CLUB

01 / Saving

BUILD A CUSHION WITHOUT MAKING LIFE MISERABLE.

1	Review this list of my monthly expenses: [paste expenses]. Find five realistic places I can save without cutting essentials or everything I enjoy.
2	My take-home income is [\$___] and my fixed bills are [\$___]. Create a three-level savings plan for tight, normal, and strong-income months.
3	Help me set an emergency-fund goal based on [household size], [income stability], [monthly essentials], and [current savings]. Show the math.
4	Turn my goal of saving [\$___] by [date] into a weekly plan, including what to automate and what to track.
5	Compare my current subscriptions and memberships: [paste list]. Flag duplicates, low-use items, and what I should renegotiate before canceling.
6	Create a 30-day savings challenge that fits my real budget of [\$___] and does not rely on skipping meals or essentials.
7	Analyze these last 30 days of purchases: [paste transactions]. Separate one-time surprises from repeat leaks and estimate my annual savings opportunity.
8	Give me a script to negotiate a lower rate on my [internet/insurance/phone bill], plus three backup asks if they say no.
9	I keep pulling money back out of savings for [reason]. Help me redesign my accounts and rules so the plan matches my actual life.
10	Build a sinking-fund plan for these future expenses: [list]. Rank them by urgency and assign a monthly amount to each.

02 / Investing

USE AI TO LEARN AND ORGANIZE - NOT TO PREDICT THE FUTURE.

11	Explain the difference between an ETF, individual stock, bond, and cash account using plain language and one everyday analogy for each.
12	Based on my goal [goal], timeline [years], and comfort with losses [low/medium/high], give me questions to ask before choosing an investment mix.
13	Compare these funds: [tickers]. Show expense ratio, diversification, overlap, major risks, and what information I still need to verify.
14	Teach me dollar-cost averaging with a simple example using [\$___] per month, including what it can and cannot protect me from.
15	Review this company summary or earnings report: [paste]. Translate the business model, growth drivers, debt, risks, and red flags into plain English.
16	Create a one-page investment policy statement for me with goals, contribution rules, diversification rules, rebalancing schedule, and reasons I would sell.
17	I am considering buying [ticker]. Give me a balanced bull case, bear case, key numbers to verify, and five questions that could disprove my idea.
18	Calculate how monthly investments of [\$___] could grow over [years] at 4%, 7%, and 10%. Clearly label these as scenarios, not promises.
19	Help me identify concentration risk in this portfolio: [paste holdings and percentages]. Suggest categories to research, not specific purchases.
20	Create a quarterly investing review checklist that focuses on my plan, fees, diversification, and contributions instead of daily price movement.

03 / Options

UNDERSTAND THE CONTRACT BEFORE YOU RISK THE PREMIUM.

21	Explain calls, puts, strike price, expiration, premium, and break-even using one simple example with round numbers.
22	Compare buying 100 shares of [ticker] with buying one call option. Show capital required, maximum loss, time limit, and what must happen to profit.
23	Walk me through delta, theta, implied volatility, and gamma in plain language, then explain which matters most for my example trade: [paste setup].
24	For this option contract [paste details], calculate premium paid, maximum loss, break-even at expiration, and the move needed to reach break-even.
25	Create a pre-trade checklist for a defined options setup, including higher-time-frame trend, entry trigger, invalidation, position size, and exit plan.
26	Stress-test this options idea: [paste thesis]. Show what happens if price rises, stays flat, falls, or moves too slowly.
27	I can risk no more than [\$__] on this idea. Explain how contract price and stop placement affect position size. Do not assume I can average down.
28	Explain the risks of 0DTE options compared with 7-30 DTE contracts, including speed, theta, liquidity, and emotional pressure.
29	Create a post-trade review for this options trade: [paste entry, exit, chart notes, and emotions]. Separate process quality from profit or loss.
30	Challenge my reason for taking this option trade: [paste reason]. Identify missing evidence, emotional language, and conditions that would make no trade the best choice.

04 / Charts

START WITH THE FULL VIEW, THEN WORK DOWN.

31

Using this chart description or screenshot, identify the higher-time-frame trend, major swing high, major swing low, and whether price is trending or ranging.

32

Explain what this candlestick shows about buyers and sellers: [describe open, high, low, close]. Avoid predicting the next candle.

33

Help me mark possible supply and demand areas from this chart: [attach chart]. Explain why each area matters and what would invalidate it.

34

Compare the 4-hour, 1-hour, and 15-minute structure for [ticker]. Summarize whether the time frames align, conflict, or offer no clear setup.

35

Create an opening-range-breakout checklist using higher-time-frame bias, opening range, volume, confirmation, invalidation, and risk.

36

Review this chart and identify obvious highs or lows where orders may cluster. Explain liquidity in plain language without treating it as certainty.

37

Turn my chart notes into an if-then plan: [paste notes]. Include a bullish scenario, bearish scenario, and no-trade scenario.

38

Help me distinguish a trend pullback from a possible reversal using market structure and invalidation points.

39

Audit this chart setup for confirmation bias: [paste analysis]. Give me three observations that support it and three that weaken it.

40

Create a clean charting routine that tells me what to mark on the daily, 4-hour, 1-hour, and entry time frame - and what to ignore.

05 / Budgeting

GIVE EVERY DOLLAR A JOB THAT MATCHES YOUR REAL PRIORITIES.

41

Build a monthly budget from this income and expense list: [paste]. Separate essentials, goals, flexible spending, and true expenses.

42

My income changes each month. Create a variable-income budget using a baseline amount of [\$___] and rules for months when I earn more.

43

Use these pay dates and bills [paste] to create a paycheck-by-paycheck plan that prevents timing problems.

44

Create a realistic zero-based budget that includes fun money, irregular expenses, savings, and debt payments - not just bills.

45

Compare the 50/30/20 method, zero-based budgeting, and pay-yourself-first for my situation: [describe]. Recommend the easiest one to maintain and explain why.

46

Find expenses missing from this budget: [paste]. Check for annual fees, school costs, gifts, repairs, medical costs, and seasonal spending.

47

I overspent by [\$___] this month. Help me adjust the next four weeks without skipping necessities or creating new debt.

48

Create budget categories and monthly caps from these transactions: [paste]. Use my actual behavior instead of ideal percentages.

49

Build a simple weekly money check-in that takes 15 minutes and tells me exactly what numbers to review.

50

Turn these goals [paste] into a 90-day budget plan with one primary goal, one maintenance goal, and measurable weekly actions.

06 / Spending

SPEND ON PURPOSE, NOT ON AUTOPILOT.

51

Categorize these purchases [paste] as essential, planned joy, convenience, impulse, or avoidable fee. Show totals and patterns without shaming me.

52

Create a personal 24-hour purchase rule for items over [\$___], including five questions I must answer before buying.

53

I want to buy [item] for [\$___]. Compare buying now, waiting [time], buying used, renting, or skipping it based on my goals.

54

Identify my likely spending triggers from this journal and transaction list: [paste]. Suggest one friction step for each trigger.

55

Design a guilt-free spending amount based on my income, bills, savings goal, and debt payments: [paste numbers].

56

Help me plan for a no-spend week that still includes transportation, my child/family needs, and one low-cost treat.

57

Estimate the true annual cost of this habit: [purchase and frequency]. Then show what reducing it by 25%, 50%, or 75% would save.

58

Write three polite scripts for saying no to plans or purchases that do not fit my budget without over-explaining.

59

Create a shopping list and price ceiling for [category]. Rank must-haves, nice-to-haves, and what can wait.

60

Review these recent purchases [paste]. Tell me which ones supported my stated values and which ones were probably emotional or automatic.

07 / Money Psychology

NOTICE THE PATTERN BEFORE TRYING TO FIX THE NUMBER.

61	Help me identify the money belief underneath this behavior: [describe]. Ask me five gentle questions before offering solutions.
62	I feel [emotion] when I check my accounts. Create a five-minute grounding routine followed by one practical money action.
63	Analyze this money story I tell myself: [paste]. Separate facts, fears, inherited beliefs, and beliefs I can choose now.
64	Create a plan for preventing revenge spending or revenge trading after a stressful day or financial loss.
65	Help me define what 'enough' means for my lifestyle, family, safety, freedom, and future - not social media's definition.
66	I avoid this money task: [task]. Break it into a first step that takes less than five minutes and a reward that costs nothing.
67	Create three rules that protect me when I feel urgency, fear of missing out, or pressure to prove myself with money.
68	Help me review a financial mistake without shame. Ask what happened, what it cost, what it taught me, and what system would prevent a repeat.
69	Turn my financial goal [goal] into an identity-based habit: who I am becoming, what that person does weekly, and what they stop doing.
70	Create a short decision tree for when I want to spend, invest, or trade because I am anxious rather than because it fits my plan.

08 / Money Affirmations

USE STATEMENTS YOU CAN BELIEVE AND SUPPORT WITH ACTION.

71	Write five grounded money affirmations for someone rebuilding confidence after financial mistakes. Avoid pretending everything is already perfect.
72	Turn this negative money thought [paste] into a believable bridge statement and one action I can take today.
73	Create morning money affirmations focused on patience, self-trust, disciplined choices, and long-term growth.
74	Write affirmations for trading that reinforce risk limits, waiting for confirmation, accepting losses, and choosing no trade.
75	Create affirmations for receiving more income without overspending it or feeling guilty about wanting more.
76	Write five affirmations that connect saving money with freedom and self-care instead of punishment.
77	Create affirmations for checking my accounts calmly, facing the numbers, and making one good next decision.
78	Write money affirmations in my natural voice: warm, direct, down-to-earth, and focused on excellence and self-love.
79	Pair each of these goals [paste] with one affirmation and one weekly action that proves it.
80	Create a seven-day affirmation practice with one short statement, one journal question, and one small money action per day.

09 / Gratitude

APPRECIATE WHAT IS WORKING WHILE YOU BUILD WHAT IS NEXT.

81

Give me ten money-gratitude prompts that acknowledge support, skills, lessons, and progress without ignoring real financial stress.

82

Help me list ways money supported my life this week, including ordinary things I usually overlook.

83

Turn these financial wins [paste] into a short reflection that celebrates progress without encouraging lifestyle inflation.

84

Create a gratitude practice for payday: appreciate the income, fund priorities, enjoy a small amount, and plan the rest.

85

Ask me five questions that help me recognize non-cash wealth such as time, health, knowledge, relationships, and resourcefulness.

86

Write a compassionate letter from my future financially secure self thanking me for the small choices I am making now.

87

Help me reframe this money setback [describe] by naming what remains, what I learned, and what I can control next.

88

Create a weekly 'money went right' list with categories for income, saving, wise spending, learning, and boundaries.

89

Give me a family-friendly gratitude activity that teaches a child the difference between appreciating what we have and wanting more.

90

Turn gratitude into action: based on what I appreciate most [list], suggest three ways my budget can protect those priorities.

10 / Income Growth

MAKE MORE BY TURNING YOUR SKILLS INTO CLEAR OFFERS AND ACTIONS.

91	List ten ways I could earn more using these skills, experiences, and available hours: [paste]. Rank them by speed, startup cost, and income potential.
92	Turn this skill [skill] into three paid offers: a quick win, a core service, and a premium option. Include outcome, scope, price logic, and ideal buyer.
93	Audit my current offer [paste]. Make the result clearer, remove vague language, and give me a simple call to action.
94	Create a 30-day plan to earn an extra [\$___] using [hours per week], [skills], and [existing audience]. Show weekly outreach and sales targets.
95	Write a warm outreach message for former clients or contacts that shares what I offer and asks for one clear next step without sounding desperate.
96	Help me price this service [describe]. Estimate time, direct costs, expertise value, revisions, taxes, and a minimum profitable price.
97	Review my income sources [paste]. Identify which are scalable, reliable, high-margin, seasonal, or too dependent on one client.
98	Create five content ideas that teach something useful, show my expertise, and naturally lead to this paid offer: [offer].
99	Build a follow-up sequence for someone who showed interest but did not buy: day 1, day 3, day 7, and day 14. Keep it human and useful.
100	Help me choose the best next income move from these ideas [paste]. Score each for fit, demand, speed, profit, energy, and repeatability.
